Optical Spectra®

CUMULATIVE INDEX

1976 VOLUME 10

Subject Index

AUREOLE
Golden Days In Space—Vol. 10, Issue 3, p. 8.
Is There A Robot In Your Future?—Vol. 10, Issue 11, p. 8.
Laser Light On Tokyo—Vol. 10, Issue 4, p. 8.
Purple Pigeons-Flights Of Fancy—Vol. 10, Issue 9, p. 8.
Purple Plants In Polluted Waters—Vol. 10, Issue 5, p. 8.
Salient, Misjudged Energy—Vol. 10, Issue 2, p. 14.
Scanning Clues To Calcium—Vol. 10, Issue 10, p. 14.
Science In The Rumble Seat—Vol. 10, Issue 7, p. 8.
Side Looking Radar On Ice—Vol. 10, Issue 12, p. 8.
Space Aid For Fun And Progress—Vol. 10, Issue 8, p. 8.
Technology Seen In Patent Progress—Vol. 10, Issue 6, p. 8.
Year Of Little Direction, A—Vol. 10, Issue 1, p. 8.

COLOR
New Clue To Color Correction, A—B.H. Walker; Vol. 10, Issue 8, p. 22.

DETECTORS
Meeting Today's Detector Challenge—J. Meehan; Vol. 10, Issue 8, p. 49.

EDITORIALS
Communicating With Archie Bunker—Vol. 10, Issue 11, p. 10.
Getting The President's Ear—Vol. 10, Issue 6, p. 13.
Growing Energy Gap, The—Vol. 10, Issue 9, p. 13.
Image Is Positive, The—Vol. 10, Issue 5, p. 10.
Inching Toward Metrics—Vol. 10, Issue 2, p. 13.
Mismanaging Nuclear Wastes—Vol. 10, Issue 12, p. 10.
On Judging Scientific Issues—Vol. 10, Issue 3, p. 10.
Overselling Solar Energy—Vol. 10, Issue 7, p. 10.
Payoff From R&D—Vol. 10, Issue 10, p. 13.
Saving Science From Its Friends—Vol. 10, Issue 1, p. 11.
Support For The Sciences—Vol. 10, Issue 4, p. 13.
Viking Opens A New Frontier—Vol. 10, Issue 8, p. 9.

FIBER OPTICS
For Fiber Optic Dollars, The Best Is Yet To Come—Staff Report; Vol. 10, Issue 10, p. 34.
It's A Testing Time For Fiber Research—Robert T. Blanks, III; Vol. 10, Issue 10, p. 30.
Words On A Waveguide Future—Staff Report; Vol. 10, Issue 11, p. 48.

FILTERS
XUV Filters: Out Of This World And Back Again—G.N. Steele; Vol. 10, Issue 6, p. 37.

HOLOGRAPHY
Coherent Optics: The Biomedical Burden Of Proof—H.J. Caulfield; Vol. 10, Issue 11, p. 45.

IMAGING
TV Camera Tubes: In The Age Of Video—A.H. Mengel; Vol. 10, Issue 4, p. 36.

INTEGRATED OPTICS
More On Integrated Optics—G.B. Brandt and M. Gottleib; Vol. 10, Issue 3, p. 46.

LASERS
Elusive X-ray Laser, The—Staff Report; Vol. 10, Issue 11, p. 42.
Laser Fusion: What It Takes To Break Even—Staff Report; Vol. 10, Issue 10, p. 26.
Lasers Have Never Been Better—Staff Report; Vol. 10, Issue 5, p. 42.
OEM Lasers Wait For A Reluctant Market—Staff Report; Vol. 10, Issue 11, p. 39.

LASER ACCESSORIES
Calling Out Light Modulators—M.T.V. Sciborski; Vol. 10, Issue 2, p. 30.
Crystals: Non-Centric For Lasers—Warren Ruderman and Thomas Nowicki; Vol. 10, Issue 2, p. 22.
Electro-Optic Shutters: A Matter Of Ultra-Speed—Robert Goldstein; Vol. 10, Issue 2, p. 34.
Power Behind The Pulse, The—N. Thomas Olson; Vol. 10, Issue 12, p. 42.

MATERIALS
Materials Worth Watching—Staff Report; Vol. 10, Issue 7, p. 29.

MEASUREMENT
Industrial Accuracy And The Optical Answer—R. W. Pfoutz; Vol. 10, Issue 4, p. 39.
Why They Call It Optographics—Ralph D. Geiser and Gerald S. Gordon; Vol. 10, Issue 2, p. 38.

PLASTIC OPTICS
Plastic Optics In Surgery—P.G. Lahaye; Vol. 10, Issue 7, p. 32.

RADIOMETRY/PHOTOMETRY
Radiometry And Photometry: Once Over Lightly—R.I. Nemhauser, G. Alexander and R. Duda; Vol. 10, Issue 4, p. 30.

READER OPINION POLL
Beyond The Water's Edge—Vol. 10, Issue 12, p. 70.
Bread and Butter Issues—Vol. 10, Issue 6, p. 62.
Facing The Nation—Vol. 10, Issue 10, p. 62.
Paying For Government—Vol. 10, Issue 8, p. 78.
Picking A President—Vol. 10, Issue 2, p. 62.
What Price Environment?—Vol. 10, Issue, 4, p. 62.

READER POLL RESULTS
Beyond The Water's Edge—Vol. 10, Issue 1, p. 44.
Bread And Butter Issues—Vol. 10, Issue 9, p. 29.
In Sickness And In Health—Vol. 10, Issue 3, p. 38.
Paying For Government—Vol. 10, Issue 11, p. 50.
Picking A President—Vol. 10, Issue 5, p. 50.
What Price Environment?—Vol. 10, Issue 7, p. 23.

REPLICAS
More For Less: Replicas—S.W. Thompson; Vol. 10, Issue 5, p. 39.

SPACE
Color The Satellite Very Red—Staff Report; Vol. 10, Issue 8, p. 30.
Visual Passage To Mars—Staff Report; Vol. 10, Issue 9, p. 45.

STAFF REPORTS

6 good reasons for choosing the TEKTRONIX J16 Photometer/Radiometer

Price is one important reason for choosing the J16 Photometer/Radiometer for your light measurement needs. If you need to make spot measurements, combine the J16 Photometer/Radiometer *($690) and J6523 1° Luminance Probe *($950). There are seven other probes (priced from *$330 to *$400) for measuring illuminance, irradiance, luminance, LED output, or relative intensity.

Versatility is another important reason for selecting the J16. All the probes are precalibrated and quickly interchangeable. They operate attached to the J16 or separately with an optional extender cable. For field use, the J16 comes with a rechargeable internal battery pack; and for the lab, an ac version is available. If you select the J6523 1° spot probe, you get an optical sighting system that lets you see the point you're measuring. For automatic data logging, analog and digital outputs are available.

Portability and ruggedness are two more reasons for selecting the J16. The J16's small size and light weight (3.3 lb) make it easy to carry along on field trips. There's even a shoulder strap that makes carrying easy and frees your hands for other tasks. The J16 is rugged enough to operate from −15°C to +40°C and it meets MIL specs for humidity.

Excellent stability and linearity are also important. All the probes use silicon photodiodes and multi-element glass filters for excellent long-term calibration stability.

There are many more good reasons to select the J16. We'd like to send you some literature that describes the J16's capabilities in more detail.

For more information, write Tektronix, Inc., P.O. Box 500 Beaverton, OR 97077. In Europe, write Tektronix Limited, P.O. Box 36 St. Peter Port, Guernsey, Channel Islands. For applications assistance, phone Pete Keller at (503) 644-0161, ext. 7769. For a demonstration, contact your nearest Tektronix Field Office.

*U.S. Sales Price, FOB Beaverton, Oregon.

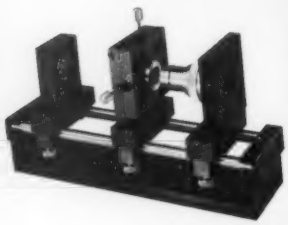
Ealing

The Minibench



- Simple double rail miniature optical bench
- Available in two lengths 100mm and 200mm
- Useful for optical sub-assemblies
- Full range of carriers and micropositioning units
- Ideal for prototyping optical systems

Full specifications are listed on page 360 of the 76/77 Ealing catalog.

Write for your FREE copy

INFRARED SENSORS
Offer high sensitivity and broad-band response from UV through microwaves. Rugged and nonhygroscopic. Require no cryogenics (operational range is −40°C to +90°C).

IR LASER WINDOWS
Large windows—up to 16" diameter—available in single crystal or POLYTRAN™ materials. Standard sizes, lenses and special shapes are in stock for applications in the UV through the IR regions.

SILICON IR PHOTO-DETECTORS
These state-of-the-art detectors feature high stability and low noise for a variety of laser detection applications. Offered with single element, quadrant or multi-element active geometries.
